Mr. Tom Lammert
1162 South Highway 191
Moab, Utah 84532

Dear Mr. Lammert:

Thank you for your Notice of Intent to Commence Small Mining Operations, received at this office on November 7, 1988. Everything is complete on the form except that we will need a copy of a topographic map more specifically defining the location of the mine and the area to be disturbed. A U.S.G.S. 7.5 minute series map is preferred.

The Vanadium Queen is a pre-law disturbance. You will not be held responsible for the reclamation of any pre-existing disturbance if you do not reuse or reimpact an area. The regulations require that any new disturbance or reimpacted areas on such sites must be reclaimed.

You might want to document what is pre-disturbance vs. what is not on the site. This can be done by using photographs, outlining the area on a large scale drawing, or simply describing the area by narrative.

You mentioned the installation of a retention pond on the site. For such a facility you will need to obtain a permit from State Health's Bureau of Water Pollution Control.

Please contact me if you have further questions.

Sincerely,

Holland Shepherd
Reclamation Soils Specialist
